Asthma Control Check

**Find out if your asthma
is under control.**

Is your asthma well controlled?

Take this simple test to find out:

Do you need your reliever inhaler (usually blue) more than 3 times a week? YES NO

Do you experience symptoms such as cough, wheeze, shortness of breath and/or chest tightness more than 3 days a week? YES NO

Does asthma limit your ability to exercise or play sports? YES NO

Do you have night-time symptoms once a week or more? YES NO

Do you miss school or work because of asthma? YES NO

Answering YES to any one of these questions may mean that your asthma is not controlled. You may wish to make an appointment to talk to your healthcare provider. To find out more, call a Lung Association Certified Respiratory Educator at 1-888-344-LUNG (5864).

The Lung Association can help!

Our Certified Respiratory Educators can answer your questions and provide up-to-date educational materials about living with asthma. We also have materials specific to children living with asthma and the real issues that families deal with on a daily basis. These services and materials are free to Ontario residents.

Call our toll-free Lung Health Information Line today at 1-888-344-LUNG (5864) or visit our website at lungontario.ca

What can you do to better control your asthma?

- 1 Try to identify the triggers that may cause your asthma symptoms and avoid them when possible.
- 2 Understand the types of medicines used to treat asthma and the differences between reliever and controller medicines.
- 3 Learn the warning signs of asthma and know what to do when you have an asthma attack. Talk to your healthcare provider about providing you with a written asthma action plan. Review your action plan at every visit. Ask questions and talk openly about your concerns.
- 4 Ask your healthcare provider to show you how to use your inhalers.

Is something in your home triggering your asthma?

These are some common asthma triggers found in the home:

- cigarette smoke
- pets
- dust mites
- moulds
- household cleaning products
- pollens
